

Conveyor

Our food-grade conveyors are commonly used in the vending and commissary industries for sandwich and salad trays. Constructed of stainless steel and aluminum, these easy-to-clean conveyors are sturdy and dependable.

Lengths	8', 10', 12', 20'
Widths	8", 10"
Drive	variable-speed, 12-120 feet per minute
Options	locking casters

Side Tray

Side trays are ideal for holding prepared product ready for the conveyor.

Tilt Table

Delivers deli tubs, cups and lids from a vertical thermoformer into a horizontal wrapping machine.

Side Table

Facilitating product loading, the side table comes in a variety of lengths and three tilt positions. Available on castors for portability or mounted directly to the machine conveyor.

Tray Denester

Automatically places trays into the pallets of our tray sealing machines. Adjusts to various tray sizes and only requires one operator to keep the magazine full.

Lazy Susan

Manufactured with a stainless steel top and aluminum frame, the turntable height is easily adjustable to integrate with various AmeriPak horizontal wrappers and tray sealers.

Diameters	36", 48"
Drive	fixed-speed, 115V, 3PH
Optional	variable-speed motor mounted pack-off table height adjustment casters

Rotary Card Sheeter

Automatically places flat or U-shaped cardboard into flight spacings of the wrapper infeed. It can be positioned at the end of the wrapper (requirement for a 'U' shape card) or placed at right angles to the infeed conveyor.

Drive	mechanical or electronic
Output	200+ per minute
