

Selecting your AmeriPak machine

Size, Speed, Space

Each packaging application presents a different set of requirements.

Consider the dimensions of your product and/or container size. All AmeriPak machines have a maximum package size.

Factor the speed (packages per minute) by how many products you need to wrap or seal to meet production goals.

Take a look at your production space. How much room is available to house, setup, and operate your machine?

Infeed

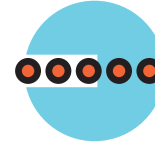

All wrappers have enough feeding space for two people to work.

Additional 2.5' or 5.0' sections are optional to lengthen the infeed if required.

Dual pitch quickly changes the infeed from over-wrapping short to longer products—without tools—in under one minute.

The Series 30 Tray Sealer has 22" of clear feeding space. While the base Series 60 has 49" of clear feeding space with optional extensions of 48" each.

Side tables add convenience to feeding your product into the machine.

Discharge

An AmeriPak wrapper includes a 24" or 48" driven discharge conveyor.

Tray sealers are equipped with discharge rails. An optional roller or driver conveyor is available.

Horizontal Flow Wrappers

Series 90

Compact, Flexible package sizes, Low maintenance, Easy changeover

Performance Output

Units wrapped and sealed at speeds up to 90 ppm

Series 150

Built to last, Wide range of product sizes, Easy changeover

Performance Output

Units wrapped and sealed at speeds up to 250 ppm

Series 150 Horizontal Flow Wrapper

Tray Sealers

Series 30

Portable, Compact, Sanitary

Performance Output

Units sealed at speeds up to 30 cpm

Series 60

Quick heat recovery, Ultra efficient, Built to last

Performance Output

Units sealed at speeds up to 60 cpm

Series 60 with denester

Request a High Performance Solution

All AmeriPak machines are manufactured at our Pennsylvania headquarters, side-by-side with the engineering design lab. Our resource center produces accurate, price-competitive parts for both machine and change parts. This allows us to provide AmeriPak designed and manufactured parts for quick delivery.
